MEMORANDUM

SUBJECT: Fact Sheet - Arkwood Inc. Superfund Site, Omaha, Arkansas

TO: Roberta LLOYD
PRC

FROM: Rick Ehrhart *RLE 11/18/91*
Environmental Scientist (6H-EA)

Roberta, following is some fairly general information about the Health and Safety Plans that the PRPs will develop during the Design phase of the project as agreed to in the Consent Decree.

During the Remedial Design phase of this project, the PRPs will develop a Safety, Health and Emergency Response Plan (SHERP) which will detail standard procedures to follow while the site is being remediated. The SHERP will incorporate an Air Monitoring Plan, a Contingency Plan and a Spill Control and Countermeasures Plan for the site activities.

The Air Monitoring Plan will be the basis for chemical constituent sampling in the atmosphere and will include personnel monitoring, onsite monitoring stations, monitoring stations at the perimeter of the site and monitoring stations at the school. The purpose of this monitoring program is to assure that all air concentrations for contaminants of concern at the Arkwood site are below any action levels set by EPA.
